POLYTHERM OF THE TERTIARY SYSTEM MnCl_2 -NaCl-KCl, A. G. Bergman, and Ye. I. Banashek	67
FLUXES WHICH DO NOT CONTAIN LITHIUM FOR GAS WELDING OF ALUMINUM ALLOYS, A. G. Bergman, Ye. I. Speranskaya, and I. M. Brailovskiy	67
TERTIARY SYSTEM NaF-KF-MgF, A. G. Bergman, and Ye. P. Dergunov	68
IRREVERSIBLE RECIPROCAL SYSTEM OF POTASSIUM AND SODIUM CHROMATES AND FLOURIDES, A. G. Bergman, and Ye. P. Dergunov	69
FUSIBILITY DIAGRAM OF INTERNAL SECTIONS OF THE QUATERNARY SYSTEM LiF-NaF-KF-MgF_2 , A. G. Bergman, Ye. P. Dergunov, and I. N. Nikonova	
STUDY OF THE POLYTHERM OF THE QUATERNARY SYSTEM WATER-SODIUM CHLORIDE-CALCIUM CHLORIDE-MANGANESE CHLORIDE, N. P. Luzhnaya, and I. P. Vereshchetina	70
READILY FUSED SALT VATS FOR HEAT TREATING OF METALS, N. P. Luzhnaya Ye. I. Speranskaya, and I. N. Tugushi-Lashevskaya	71
STUDY OF A QUATERNARY RECIPROCAL SYSTEM OF CHLORIDES AND SULFATES OF SODIUM POTASSIUM AND ZINC, N. P. Luzhnaya	
THERMAL PROPERTIES OF NITRITE NITRATE MIXTURES, V. Ya. Anosov, and N. K. Voskresenskaya	71
HEAT CONTENT OF NITRATE MIXTURES, V. YA. Anosov, and N. K. Voskresenskaya	71

	<u>Page</u>
FUSIBILITY DIAGRAM OF THE SYSTEM $ZnCl_2-NH_3$ IN THE RANGE, WHICH IS ENRICHED BY ZINC CHLORIDE, M. I. Ravich, and Ye. V. Frolova	71
NEW SALT VAT FOR LOW TEMPERATURE ANNEALING OF DURALUMINUM AND SPECIAL STEELS, A. G. Bergman, A. Yum Mett, A. P. Obukhov, and L. A. Petrov	72
NEW SALT VAT FOR HEAT TREATMENT (ANNEALING AND QUENCHING) OF DURALUMINUM, A. G. Bergman, V. P. Kozlovskaya, A. P. Obukhov, L. A. Petrov, Ye. I. Speranskaya	72
CONCENTRATED AND SATURATED SOLUTIONS OF POTASSIUM NITRATE AS A QUENCHING MEDIUM FOR ALUMINUM ALLOYS, A. G. Bergman, V. P. Kozlovskaya, Ye. I. Kutaytseva, A. P. Obukhov, and P. Ya. Ositsov	73
CHEMISTRY OF SILICATES	
STUDY OF GLAZES OF HIGH VOLTAGE PORCELAIN AND ITS EFFECT ON THE QUALITY OF INSULATORS, I. V. Grebenshchikov, V. P. Barzakovskiy, L. Yu. Kurtts, K. S. Evstrop'yev, M. M. Skornyakov	73
DETERMINATION OF THE QUALITY OF THE SURFACE OF GLAZES OF HIGH VOLTAGE INSULATORS (Dissertation), S. K. Dubrovo	74
DIFFUSION OF GASES IN MOLTEN GLASS, B. V. Barbarin	75
PHYSICOCHEMICAL ANALYSIS OF ORGANIC SYSTEMS	
STUDY OF THE EQUILIBRIUM IN BINARY SYSTEMS, COMPOSED OF NITROBENZENE m-NITROBENZENE AND 1, 3, 5-TRINITROBENZENE, N. N. Yefremov, and O. F. Bogush	75

ABSTRACTS OF SCIENTIFIC RESEARCH WORK FOR 1944.DEPARTMENT OF CHEMICAL SCIENCES, ACADEMY OF SCIENCES USSR

Foreward	3
WORK OF THE DEPARTMENT OF CHEMICAL SCIENCES, ACADEMY OF SCIENCES USSR, FOR THE YEAR 1944.	5
INSTITUTE OF GENERAL AND INORGANIC CHEMISTRY Imeni N.S. KURNAKOVA OF THE USSR ACADEMY OF SCIENCES.	10
<u>Development of the Theory and Methods of Physico-Chemical Analysis</u>	
V. Ya. Anosov, S. A. Pogodin. General course in physico- chemical analysis.	12
V. Ya. Anosov. Geometric Basis of the Structure of the Sim- plest diagrams of reciprocal systems.	12
M. A. Klochko. General types of property-composition dia- grams of monophasic ^{ternary} triple systems.	12
A. V. Nikolayev. Research in the field of solution electro- striction.	12
L. G. Berg, V. N. Sveshnikova. Study of gypsum and of the products of its dehydration.	13

Thermochemistry

- A. F. Kapustinskiy. The periodical law and chemical thermodynamics. Entropies of simple bodies and ions in Mendeleev's system. 14
- A. F. Kapustinskiy. Impossibility of the perpetual motion of the 4th kind. 14
- V. Ya. Anosov, N. K. Voskresenskaya. Thermic properties of ~~saline solutions~~. *salt solutions*. 14
- N. K. Voskresenskaya. Isotherms of the integral heat of salt ~~solvation~~. *solution*. 15

Nature of Metal Alloys

- N. V. Ageyev, Ye. S. Makarov. Study of the nature of ^{the} chemical ~~combinations~~ *bond* by the method of electronic density in MgO and MgCu₂. 15
- L. N. Guseva. Study of the character of the chemical ~~combinations~~ *bond* of the aluminum atom in the intermetallic phases, conducted by the method of electronic density. 15
- N. V. Ageyev, L. N. Guseva. Distribution of electronic density in metallic aluminum. 16
- N. V. Ageyev. Nature of the chemical combination in metal

alloys.	16
V. G. Kuznetsov. Comparison of the electronic densities of a solid solution and of a regulated structure.	16
N. N. Sirota. Speed of emergence of nuclei of a new phase and the hysteresis of transformation (theory of phase transformations in a solid body. 1).	16
N. N. Sirota. Speed of formation of nuclei of an excess phase in supersaturated supercooled solid solutions. (Theory of phase transformations in a solid body. 2.)	17
N. N. Sirota. Intermediate metastatic conditions during dis- persion solidification. (Theory of phase transfor- mations in a solid body. 3.)	17
N. N. Sirota. Temperature relationship of the specific heat of simple bodies to their positions in Mendelee- yev's Table. I.	17
N. N. Sirota. Thermodynamics of intermetallic fusions (Ber- thollides and daltonides).	17
N. N. Sirota. Thermodynamic conditions for the formation of chemical compounds and the main principle of crystal- lochemistry.	18
N. N. Sirota. Thermodynamics of solid solutions of metal systems.	18

Metal Alloys of the Iron Group

- A. T. Grigor'ev, D. L. Kudryavtsev. Physico-chemical study of the iron corner of the system: iron, manganese, carbon. 18
- A. T. Grigor'ev, D. L. Kudryavtsev. Transformation $\delta \rightarrow \gamma$ in the triple iron system, one of the components of which forms with iron a closed field of the γ -phase, while the other forms an open field. 19
- I. I. Kornilov, A. I. Tat'yanchikova. Fusibility diagram of the system Cr--Mn. 19
- I. I. Kornilov, R. S. Mints. Study of the quadruple solid solution Fe--Cr--Ni--Al. 19
- I. I. Kornilov, A. A. Azovskaya. Scientific formation of the heat-resistant alloy No 3. 19
- N. M. Voronov. Study of the system: Iron--niobium--carbon. 20
- N. N. Kurnakov, N. N. Sirota, M. Ya. Toneva. Study of the influence of silicon, manganese, and other elements on the flowability of blast furnace ferrochromium. 20
- N. N. Kurnakov, M. Ya. Troneva. Determination of the flowability of iron alloys with silicon and with phosphorous 21
- V. G. Kuznetsov. Study of the nature of the highly coer-

cive force of the Fe--NiAl plan.

21

I. I. Kornilov, Ye. A. Kremleva. Relation between the reaction speed in solid solutions and the chemical composition of a balanced system. I. Reduction speed of chromites and oxides of iron and chrome.

21

I. I. Kornilov, A. I. Shpikel'man. Relation between the reaction speed in solid solutions and the chemical composition of a balanced system. II. Oxidation speed of solid solutions at high temperatures.

22

N. N. Sirota. Effect of initial heat treatment on the magnetic properties of tempered steel.

22

alloys of
Physico-chemical analysis of light and non-ferrous metals

D. A. Petrov, N. D. Nagorskaya, I. S. Shumova. Study of the diagram of ^{state of} ~~the condition~~ Al--Cu--Mg--Zn.

22

D. A. Petrov, Z. M. Novozhenyuk. Study of the system Al--Cu--Zn.

23

D. A. Petrov, T. A. Badayeva. Study of the system Al--Zn.

24

V. I. Mikheyeva, O. N. Kryukova. Study of the system Al--Mg--Zn.

24

G. G. Urazov, M. S. Mirgalovskaya. Study of the nature and properties of the triple phases in the system Al--Cu--Mg.

24

- Ye. M. Savitskiy, M. A. Tylkina, V. V. Baron, V. P. Lebedev.
Study of the mechanical properties of the intermetal-
lic phases at various temperatures. 25
- Ye. M. Savitskiy, L. V. Mel'nikova. Study of the mechanical
properties of magnesium alloys with aluminum and zinc. 25
- Ye. M. Savitskiy, M. V. Stepanova. Effect of temperature on
the mechanical properties of certain cast brasses. 25
- V. G. Kuznetsov. Crystallochemistry of aluminum alloys. 25
- V. G. Kuznetsov. Solubility of various metals in aluminum. 26
- V. G. Kuznetsov. Solubility of magnesium and silicon, mag-
nesium and copper in aluminum and the structure of
triple solid solutions. 26

Study of the Alloys of Noble Metals

- V. A. Nemilov, A. A. Rudnitskiy, R. S. Polyakova. Study of
alloys of the triple system platinum--palladium--sil-
ver. 28
- V. A. Nemilov, A. A. Rudnitskiy, R. S. Polyakova. Study of
the system palladium--ruthenium. 28
- V. A. Nemilov, T. A. Vidusova, V. K. Nikitina. Study of al-
loys of the triple system palladium--nickel--chromium. 28

- V. A. Nemilov, A. A. Rudnitskiy, R. S. Polyakova. Study of
the system palladium--tungsten. 28

Methods of Metal Ore Processing

- G. G. Urazov, I. S. Morozov. Physico-chemical study of the
processes in obtaining active manganese dioxide. 29
- I. S. Morozov. Obtaining niobium pentoxide from pyrochlore
by the chlorine method. 29
- Ye. Ya. Rode. New comparative method of inscribing the heat-
ing differential curves. 29
- Ye. Ya. Rode. Physico-chemical study of manganese oxides and
hydroxides. 1. System ~~tri~~oxide--water. 30
- Ye. Ya. Rode, Z. S. Golovleva, V. P. Vasil'eva. Physico-chem-
ical study of manganese oxides and hydroxides. 2.
Manganese dioxide--water system. 30
- V. G. Kuznetsov. X-ray study of the products forming during
the preparation of GAP (active pyrolusite of GIPKh). 30
- A. Ya. Zvorykin. Relation between the transformation of sul-
fur during the oxidizing of sulfides and the changes
in the solid and gaseous phases. 31
- A. Ya. Zvorykin, N. K. Grigor'eva. Study of the gaseous
phase during the oxidizing of sulfide concentrates. 31

- F. M. Perl'man, T. I. Arnol'd. Study of the catalytic activity of the hydroxides of cobalt and other metals of the iron group with the aid of the physico-chemical analysis method. 32

Physico-Chemical Analysis of Aqueous Saline Balances

- E. B. Shternina, Ye. V. Frolova. Solubility in the system $\text{CaCO}_3\text{---NaCl---CO}_2\text{---H}_2\text{O}$ at 25 degrees Centigrade. 32
- E. B. Shternina, Ye. V. Frolova. Activity of calcium bicarbonate in the presence of carbon dioxide at 25 degrees Centigrade. 32
- E. B. Shternina, Ye. V. Frolova. Solubility in the system $\text{CaSO}_4\text{---NaCl---CO}_2\text{---H}_2\text{O}$ at 25 degrees Centigrade. 33
- E. B. Shternina, Ye. V. Frolova. Solubility of carbon dioxide in aqueous salt solutions. 33
- A. V. Nikolayev, O. K. Yanat'eva. Obtaining magnesium hydroxide and hydrochloric acid from brines. 33
- O. K. Yanat'eva. Equilibrium in quadruple aqueous systems of alkaline and alkali earth metals' chlorides. 34
- O. K. Yanat'eva. Study of equilibria in the system K, Na, Mg || Cl, $\text{SO}_4\text{---H}_2\text{O}$ (sea water). 34
- A. V. Nikolayev, E. B. Shternina, Ye. V. Frolova. Rendering

- soils impermeable by means of films (inculcation). 35
- M. I. Ravich, V. Ya. Ketkovich. Study of the properties of concentrated aqueous solutions on the border with the melted state. 35
- M. I. Ravich, F. Ye. Boravaya. Boiling isobars of saturated aqueous solutions of sodium and potassium nitrites and intrates. 36
- M. I. Ravich. State diagrams of triple systems $\text{KNO}_3\text{--NaNO}_3\text{--H}_2\text{O}$ and $\text{NaNO}_3\text{--NaNO}_2\text{--H}_2\text{O}$ at temperatures above 100 degrees centigrade. 37

Study of Saline Deposits

- I. N. Lepeshkov, N. V. Bodaleva. Physico-Chemical characteristics and genesis of the saline layers of the Inderskiy deposits. 38
- I. N. Lepeshkov, N. V. Bodaleva. Explanation of the formation conditions of natural potassium-magnesium salts. 38
- V. I. Nikolayev, Ye. N. Tverdova. The problem of sulfate in the Priaral. 39
- V. I. Nikolayev, Kh. B. Fradkina. Crystallization methods of salts from the brines of the Aral Sea at 35 degrees Centigrade. 39

- V. I. Nikolayev, Ye. N. Tverdova. Industrial exploitation of astrakanite to obtain glauber salts. 39
- M. A. Klochko. The possibility of changing the water and salt balance of the Azov Sea. 39
- A. G. Bergman, G. A. Bukhalova, M. N. Murgaliyeva. Exploration of the salt deposits of Tyan'shan Neogenic halite-sulfate formation. 40

Physico-Chemical Analysis of Melted Salts

- A. G. Bergman, M. N. Murgaliyeva. Homeomorphous transformations in the system $H_2O-KCl-K_2SO_4$. 40
- A. G. Bergman, Ye. O. Banashek, G. A. Bukhalova, Ye. I. Speranskaya. Study of the exchange decomposition in reciprocal systems with fluroids. 41
- A. G. Bergman, Ye. P. Basova, Ye. N. Banashek. Study of the quadruple reciprocal system of sulfates, chlorides, and sodium and potassium nitrates. Homeomorphous transformations and the new type of straightway quadruple points. 41
- N. P. Luzhnaya, I. P. Vereshchetina, N. N. Evseyeva. The system Na, K, Zn, SO_4 , Cl as a basis for choosing alloys for metal heat treatment baths in the interval between 350 and 700 degrees Centigrade. 42

K. A. Evdokimova, A. G. Bergman. Study of triple reciprocal systems with bichromates. 43

K. A. Evdokimova, A. G. Bergman. Study of quadruple reciprocal systems with bichromates, nitrates, chlorides, sulfites. 43

S. I. Vol'fkovich. Study of the tempering and modifying processes for ammonium nitrate. 44

Physico-Chemical Analysis of Organic Systems

N. N. Efremov, A. A. Frolova. Study, by means of heat analysis, of a series of systems formed by hydrocarbons and intraderivatives of diphenylamine. 44

N. N. Efremov, I. A. Leskovich. Change of Internal Tensions of the intraderivatives of the aromatic series during their compression under various temperature and pressure conditions. 45

O. K. Khayshbashev, O. F. Bogush. Solubility of tetryl in organic solvents. 45

G. B. Ravich, G. G. Tsurinov. Study of the polymorphism of highly saturated triglycerides. 45

G. B. Ravich, G. G. Tsurinov, V. A. Vol'nova. Study of the polymorphism of trilaurin by microscopic and thermic methods. 46

O. K. Khayshbashev. Heat expansion of the phenol intraderivatives.

46

Chemistry of Complex Compounds

I. I. Chernyaev, G. S. Muraveyskaya. Study of the reaction of salts of the Blomstrand type.

46

I. I. Chernyaev, V. A. Golovnya, L. A. Nazarova. Hydrolysis of the intrylic and amidic compounds of bivalent platinum.

47

A. M. Rubinshteyn. Study of the Stereochemistry of complex compounds under high pressure.

47

V. V. Lebedinskiy, Ye. V. Shenderetskaya. Interaction between rhodium complex compounds and sodium sulfites.

47

V. V. Lebedinskiy, I. A. Fedorov. Study of the structure fo rhodium and iridium dimethylgloximines.

48

A. D. Gelman, Ye. A. Meylakh. Obtaining complex compounds of platinum with ethylene in the cation.

49

A. D. Gelman. Complex platinum compounds with symmetrical dichlor-diethyl sulfide.

49

A. D. Gelman, S. V. Bukhovets, Ye. A. Meylakh. Complex compounds of platinum with acetylene derivatives.

49

A. A. Grinberg, A. D. Troitskaya. Interaction between the salts of platinum metals with derivatives of phosphorous acid. 49

A. A. Grinberg, Z. A. Razumova. Complex compounds of platinum with triethylphosphin. 49

Refining of Noble Metals

V. V. Lebedinskiy, O. E. Zbyagintsev, A. M. Rubinshteyn, I. A. Fedorov. Rationalization of existing methods and development of new methods of refining noble metals. 50

L. D. Flaksina. Physico-chemical study of the Noril muds. 50

O. E. Zvyagintsev, V. N. Vorob'eva. Enrichment of copper-nickel muds by means of fractional melting. 50

Chemical Analysis of Inorganic Substances.

I. V. Tananayev. Study by the photoelectric method of the formation reaction of silico-molybdenic acid in diluted aqueous solutions. 51

I. V. Tananayev. Study by the photoelectric method of the interaction in the system of $(PtCl_6)^{2-}$ and J^{2+} ions in aqueous solution. 51

A. A. Grinberg, Z. Ye. Gol'braykh. Volumetric method of

- determining tetravalent platinum. 51
- A. A. Grinberg, Z. Ye. Gol'braykh. Determining the presence of small quantities of palladium in large quantities of nickel. 51
- N. K. Pshenitsyn. Application of poorly soluble sulfides in the separation and determining of platinum and palladium. 51
- N. K. Pshenitsyn, M. V. Lazareva. Study of methods for the quantitative determination of iridium. 52
- N. K. Psenitsyn, Ye. A. Yakovleva. Method of determining the presence of rhodium and tritium in copper-nickel concentrates. 52
- I. V. Tananayev, G. S. Savchenko. Study of the complex fluorine compounds of tantalum and niobium. 52
- I. V. Tananayev, A. I. Ulbyanov. Study of the nature of common sedimentation in systems of the type: MeSO_4 — BaSO_4 — H_2O . 53
- I. V. Tananayev, A. M. Tikhomirova. Study of the solubility of double ferro-cyanides of alkaline metals and of calcium. 53
- I. V. Tanayev, M. A. Nekhamkina. Study by the method of electroconductivity of the system of Al^{+++} — and F^{-} ions and of the solubility of cryolite in electrolytic solutions. 53

I. V. Tananayev, M. I. Levina. Development of an accelerated method to determine Fe, Cu, Ni, S, and SiO₂ in muds of the noble metals.

54

Geochemistry of noble metals.

O. Ye. Zvyagintsev. Study of the discovery of noble metals in the Noril sulfide ores.

54

O. Ye. Zvyagintsev. Geochemistry of palladium.

54

INSTITUTE OF ORGANIC CHEMISTRY OF THE
ACADEMY OF SCIENCES USSR

Synthesis of hydrocarbons and study of the relationship between their Properties and Structures

A. D. Petrov, D. N. Andreyev. Synthesis and properties of certain mono- and poly-alkylnaphtalines.

58

D. N. Andreyev. Alkylation of naphtaline with halogenoalkyles in the presence of metallic lithium.

58

A. V. Voronova. Synthesis of the hydrocarbon C₁₈H₃₀.

59

A. D. Petrov, M. A. Chel'tsova. Synthesis of diolefinic hydrocarbons with a structure C₃₀-C₄₃.

59

A. D. Petrov, Ye. P. Kaplan. Synthesis of the isoparffinic hydrocarbon with a structure C₂₈H₅₈.

60

A. F. Plate, G. A. Tarasova. Obtaining p-cymene from sulfate turpentine.

60

A. F. Plate, O. D. Sterligov, P. A. Bazhulin. Hydrocarbons of the cyclopentane series with a double bond in the side chain. 4-cyclopentylbuten-2 and 3-cyclopentylbuten-1

61

Organic Synthesis of the Basis of Unsaturated Compounds

I. N. Nazarov, L. B. Fisher. New type of isomerization of 1,3-diene alcohols.

61

I. N. Nazarov, T. D. Nagibina. Diene synthesis on the basis of divinylketones.

62

I. N. Nazarov, L. N. Terekhova. Substances containing a methylenic radical with mobile hydrogen atoms, and their capacity to be joined to divinylketones.

63

I. N. Nazarov, A. Kh. Khomenko. Addition of primary amines to divinylketones.

64

I. N. Nazarov, A. N. Elizarova. Addition of hydrogen sulfide to divinylketones.

64

I. N. Nazarov, A. N. Elizarova. Formation mechanism of tetrahydro- γ -pyrones upon hydration of divinylketones.

65

I. N. Nazarov. Formation mechanism of oxygen heterocycles.

65

- I. N. Nazarof, I. I. Zaretskaya, G. P. Verkholetova, M. S. Burmistrova, L. N. Pinkina, S. S. Vakhmutskaya. Cyclization of substituted vinylalkylketones into cyclopentones. 66
- M. F. Shostakovskiy. Significance of the purity degree of alkylvinyl ethers in the polymerization processes. 68
- M. F. Shostakovskiy. Oxonian theory of catalytic transformations of alkyl-vinyl ethers. 68
- M. F. Shostakovskiy, A. V. Bogdanova. Testing for and properties of α -Cl-Chlor-alkyl ethers. 69
- M. F. Shostakovskiy, F. P. Sidel'kovskaya. Dichlorethylalkyl ethers and their derivatives. 69
- M. F. Shostakovskiy, Ye. P. Gracheva. Obtaining vinyl ethers of glycerin and study of their properties. 71
- M. F. Shostakovskiy, Ye. N. Prilezhayeva. Azeotropic mixtures of vinyl ethers with alcohols. 73
- Ye. N. Prilezhayeva, M. I. Batuyev, M. F. Shostakovskiy. Raman spectrums of alkylvinyl ethers. 74
- M. F. Shostakovskiy, N. A. Gershteyn. Transformations of simple vinyl ethers. Synthesis of acetals on the basis of simple vinyl ethers. Report 1. 75

- S. N. Ushakov, I. A. Arbuzova, Ye. N. Rostovskiy. Synthesis of the polyvinylbutyral acetal. 78
- B. A. Arbuzov, V. M. Zorostrova. Simultaneous action of chlorine and ethylene oxide on butadiene. 79
- B. A. Arbuzov, V. M. Zorostrova. Action of unsaturated halogen derivatives upon dienes. 80
- B. A. Arbuzov, V. S. Abramov, L. A. Shapshinskaya. Reduction of cyclic compounds by means of hydrocarbons. 81
- V. S. Abramov. Action of vinyl ethers and unsaturated compounds containing a vinyl radical upon cyclic compounds 82
- V. S. Abramov. Action of vinyl ethers and unsaturated compounds containing a vinyl radical upon phenocyclic compounds. 83
- Study in the Field of Metallorganic Compounds
- A. N. Nesmeyanov, R. Kh. Freydina, A. E. Borisov. Organic compounds of mercury. Report XXVIII. More about the structure of the products of addition of metal halogens to unsaturated compounds. 84
- A. N. Nesmeyanov, R. Kh. Freydina. Organic compounds of mercury. Report XXX. Synthesis of mercury deriva-

- tives of acetylene of C_2H_2HgCl type. 85
- A. N. Nesmeyanov, A. Ye. Borisov. Organic mercury compounds.
Report XXIX. δ -chlorovinylmercuriochloride. 85
- M. I. Kabachnik, P. A. Rossiyskaya. ^{Esters} Ethers of δ -keto-
^[phosphonic acid?] phosphinic acids. 86
- Synthesis of Heterocyclical compounds
- Ya. L. Goldfarb, M. S. Kondakova. Action of ^{alkyl halides} ~~haloalkyls~~ upon the amino derivatives of nicotine. 87
- Ya. L. Goldfarb, M. S. Kondakova. Benzilation of nicotine amino derivatives. 89
- M. P. Gerchuck. Research in the field of synthesizing new ^{cytotoxic} chemiotherapeutic pyroplasmodic preparations. 90
- G. V. Chelintsev, B. M. Dubinin. Synthesis of the ^{pyrimidine} ~~pyrimidine~~ portion of the vitamin B₁ molecule. 92
- Research in the Field of Cellulose and Lignin Chemistry
- V. I. Ivanov, E. D. Kaverzneva. Study of the chemical transformations of cellulose under the influence of oxidizers. 94
- N. N. Shorygina, T. Ya. Kefeli, A. F. Semechkina. Study of the structure of lignin by fission with metallic sodium in liquid ammonia. 95

P. A. Bobrov, A. V. Koperina, L. I. Kolotova. Obtaining
adipic acid from hemicellulose carbohydrates. 96

Synthesis of Superpolyamides and Study of the Polyconden-
sation Reaction

B. A. Arbuzov, D. A. Livshits. Condensation products of
dimethylol-adipamide with aromatic compounds. 96

B. A. Arbuzov, Ye. A. Pozhyl'tsova. Reduction of ~~the~~ adipic
acid dinitryl in the presence of a palladium cata-
lyst ^{and Raney} ~~lyzer~~ ~~raney~~-nickel. 98

B. A. Arbuzov, V. M. Zorostrova, S. R. Rafikov. ^{Preparation of} ~~Obtaining~~
adipic acid dinitryl. 99

V. V. Korshak, S. R. Rafikov, G. N. Chelnokova. Effect of
functional groups on the viscosity of diluted solu-
tions of polyamides. 99

V. V. Korshak, V. A. Zamyatina. Determination of the mole-
cular weight of polyamides by the terminal group
method. 100

V. V. Korshak, V. A. Zamyatina. Study of the acidolysis
reaction of a polyamide. 100

Study in the Field of Organic Catalysis

- A. A. Balandin, M. N. Marushkin. Kinetics of the dehydrogenation of butene into butylene. 101
- A. A. Balandin, O. K. Bogdanova, A. P. Shcheglova. Catalytic dehydrogenation of butylene into butadiene. 101
- A. A. Balandin, G. M. Marukyan, R. G. Seymovich. Dehydrogenation of ethylbenzene homologues into the corresponding derivatives of sterol. 102
- A. A. Balandin, M. N. Marushkin. Dehydrogenation of the higher paraffins and utilization of the reaction products. 102
- L. Kh. Freydlin, A. A. Balandin, A. I. Lebedeva, G. A. Fridman. Study of the reaction of catalytic substitutions of the haloid into the hydroxyl in the aromatic series. Report I. Catalytic activity of silica gels and their deactivation. 102
- Report II. Activators of the silica gel. 103
- Report III. Activating action of copper. 103
- L. Kh. Freydlin, A. A. Balandin, A. I. Lebedeva, G. A. Fridman. Mechanism of the vapor-phase catalytic substitution of the aromatically bonded haloid into a hydroxyl. 103

- S. L. Lel'chuk, A. A. Balandin, A. P. Belen'kaya. Oxidation of ethyl alcohol and acetaldehyde by means of water in the steam phase. 104
- S. L. Lel'chuk, A. A. Balandin, D. N. Vaskevich, F. A. Dashkovskaya. Study of the catalytic dehydration of alcohols of the aliphatic series. 104
- A. M. Rubinshteyn, N. A. Pribytkova. The role of primary crystalline formations in catalysis. 105
- A. A. Balandin, V. V. Patrikeyev. Differential thermocouple method in the heterogeneous catalysis. 106
- T. V. Rode, A. A. Balandin. Physico-chemical study of silica gel catalyzers. 106
- B. A. Kazanskiy, T. F. Bulanova. Catalytic hydration of cyclopentane with splitting of the cycle. 107
- Ya. T. Eydus. Combined application of the dynamic and static methods of the complex Fe-Cu-ThO₂-K₂CO₃ Kieselguhr-catalyzer activity for the study of the hydration of carbon oxides. 107
- Ya. T. Eydus. Combined method of activity for the study of contacts consisting of the components of the complex Fe-Cu-ThO₂-K₂CO₃ Kieselguhr-catalyzer. 108
- N. V. Elagina, Ya. T. Eydus. Reaction between carbon oxides and Mg-organic compounds. 109

- A. F. Plate. Mechanism of contact transformations of hydrocarbons of a vanadium catalyzer. V. Simultaneous hydro- and dehydrogenation of cyclic olefins (of cyclohexane and cyclopentane). 109
- N. I. Shuykin, S. S. Novikov. Contact Isomerization of synthetic and petroleum ethylcyclopentane in its vapor phase. 110
- S. S. Novikov, N. I. Shuykin, E. D. Tulupova. Effect of unsaturated hydrocarbons on the dehydrating property of a platinum catalyzer. 111
- N. I. Shuykin, T. P. Dobrynina. Study of the contact and catalytic transformations of chlorocyclohexene. 111

Physical and Physical-chemical Methods of Research in Organic Chemistry

- M. I. Batuyev, Study of the intramolecular hydrogen bond in guaiacol by the method of combination light dispersion. 112
- L. F. Vershchagin, V. A. Preobrazhenskiy. Equipment for works on oxidation with compressed oxygen under pressure up to 150 atmospheres. Certain studies pertaining to the development of a methodology for organic compound oxidation. 114
- L. F. Vereshchagin, A. M. Polyakova, V. A. Proebrazhenskiy.

Explosive decomposition of cyclopentadiene under the
action of superhigh pressure. 114

COLLOIDO-ELECTROCHEMICAL INSTITUTE OF
THE ACADEMY OF SCIENCES USSR

Electrode Processes

- A. N. Frumkin, V. G. Levich. General theory on the movement
of charged metal solid and liquid particles in elec-
trolytic solutions. 116
- V. G. Levich. Theory of the drop electrode in irreversible
reactions. 118
- T. A. Kryukova, B. N. Kabanov. Movement of the surface of
a mercury drop electrode. 118
- B. N. Kabanov, L. V. Vanyukova, D. I. Leykis. Study of the
formation of oxide films on iron. 119
- S. A. Rosentsveyg. Electrochemical conduct of powdered iron
in alkaline solutions. 121
- N. A. Bakh, V. N. Vorob'eva. Electrochemical utilization of
active oxygen in pressed manganese dioxide powder. 121
- N. A. Balashova-Gausman. Study of the double layer structure
by electrokinetic and adsorption methods. 122

- A. V. Gorodetskaya. Study of the phenomenon of mercury sticking to glass in electrolytic solutions in relation to the potential and the concentration. 123

Corrosion of Metals

- G. V. Akinov, E. N. Paleolog. Study of the electrochemical conduct of the protective film on aluminum. 124
- G. V. Akinov, A. I. Glykhova. Relation of aluminum K corrosion speed and of electrode potentials E to the pH medium. 125
- N. D. Tomashev, M. N. Tyukina, V. V. Andreyeva. Obtaining thick, hard films on aluminum alloys. 126
- N. S. Gorbunov, I. D. Yudin. Chlorine method of heat chrome plating. 126
- E. I. Gurovich. Corrosion Inhibitor for steel and iron in hydrochloric and sulfuric acid solutions at various concentrations. 127
- I. V. Krotov, M. A. Filyand. Study of the process of removing slag from steel by means of aqueous extracts of superphosphate. 127

Structure of the surface of metals

- K. M. Gorbunova, P. D. Dankov. Elementary processes of

- electrocrystallization. 127
- K. M. Gorbunova, A. I. Zhukova. Layer solution of metals. 128
